"When Ford Speaks the World Listens."

If this were the announcement of a new model you might be sketical of the car's merits, but Ford Model T is the best known car on earth. More of them are on the highways of the world than there are of any other motor car.

This is the fifth season of the Model T and its absolute reliability has been proven by 80, tion to Wm. J. Oliver Turn Plow on the market to-day. To ooo satisfied Model T owners. Think how that car has been tried and tested in four years of prove this—ask any owner We sold 50 of these plows last season and only had one broken frog returned. The frog is easiest part about a turn plow to get broken and we guarantee every one of the Wm J. Oliver Plows.

Ooo satisfied worder I owners. Think how that car has been tried and tested in four years of hard service. Ford owners in every quarter of the globe will tell you today that their Model I Cars are reliable in every emergency and of surprising efficiency and under any and all conditions. After all of the millions of miles those cars have traveled, everybody knows the Ford Model I is right.

And that's the same sterling car that is being built for 1912-75,000 of them-with added features which go to make it even more convenient and valuable for users. By reason of the largely increased production, with consequent economy in buying and making, the price for 1912 has been largely reduced.

We are now ready to close contracts with Agents and DealeJs for 1912 business.
